Summary

Backend Engineer with **3+ years** of experience building scalable **distributed systems**, **cloud-native infrastructure**, and **event-driven microservices** using **Golang** across **SCM**, **fintech**, and **cloud operations** domains, with focus on **backend architecture**, **low-latency systems**, and **production reliability**.

Experience

Source Asia

Dec 2025 – Present

Founding Backend Engineer

Remote / Bangalore

- Designed and developed the complete Golang backend architecture for an IoT and warehouse automation platform serving enterprise clients.
- Built distributed microservices using Golang, PostgreSQL, Redis, Kafka, and Kubernetes reducing API latency by 45% and critical query execution time from 900ms to 250ms.
- Engineered ERP, OMS, and warehouse integration systems using DB LISTEN/NOTIFY, SQL fallback routing, telemetry ingestion, and staged rollout pipelines on Azure AKS.
- Led backend engineering across architecture, deployments, CI/CD, debugging, and code reviews while mentoring developers and interns.

PioVation GmbH

Dec 2024 – Jul 2025

Backend Developer

Remote, Germany

- Built scalable Golang backend services with RBAC systems using Keycloak and PostgreSQL for multi-tenant AI infrastructure.
- Developed centralized gateway services for distributed AI agents reducing internal routing overhead by 35%.
- Designed hybrid storage systems using PostgreSQL, MongoDB, and MinIO improving structured and unstructured data access efficiency by 50%.
- Containerized and orchestrated backend workloads using Docker and Kubernetes across cloud and on-prem environments.

FastPay (Stealth Startup)

Mar 2024 – Dec 2024

Software Engineer

Bangalore, India

- Developed Golang notification and callback systems handling high-volume transactional workflows with low-latency delivery guarantees.
- Implemented Kafka-based asynchronous retry pipelines improving webhook delivery reliability by 30%.
- Optimized backend services using Redis, PostgreSQL, and MongoDB reducing processing latency by 40%.
- Built secure REST APIs using Gin, OAuth2, RBAC, Docker, Kubernetes, and AWS infrastructure services.

Glowtouch Technologies & Aditi Consulting

2023 – 2024

Software Analyst

India

- Worked on backend API integrations, Golang services, CI/CD pipelines, and production deployments.
- Built production-ready backend features using Golang, PostgreSQL, React.js, and internal operational tooling.

Byju's & Genpact

2020 – 2022

Associate Roles

India

- Worked on backend integrations, enterprise workflows, SQL systems, and client-facing operational tooling.

Technical Skills

Languages: Golang, SQL, C++, JavaScript

Backend Engineering: Microservices, Distributed Systems, REST APIs, gRPC, Event-Driven Architecture, Concurrency, RBAC, OAuth2

Databases & Messaging: PostgreSQL, Redis, Kafka, MongoDB, MySQL

Cloud & Infrastructure: Kubernetes, Docker, AWS, Azure AKS, CI/CD, Linux

Performance & Reliability: Query Optimization, Caching, Connection Pooling, Async Processing, Logging, Monitoring, Tracing

Frontend: React.js, HTML, CSS

Education

G. B. Pant University of Agriculture and Technology

Bachelor of Technology in Computer Engineering
